Analyze
CS Operations

ONE CASE. MULTIPLE USERS.

Designed for group efforts on individual cases, CS Operations gives you and your colleagues a digital base of operations for reviewing and analyzing materials.

Utilize the strengths
of your team

Whether you're working in a local, regional or special office, Analyze CS Operations helps to leverage your entire team's collective knowledge, skills and efforts. Alleviate the stress of working a case alone, reduce heavy workloads, and speed up investigations.

KEY ADVANTAGES

Unlock efficient collaboration on digital media investigations

- A powerful server connects multiple users, enabling teams to gather knowledge in a centralized place and work together.
- Automated processes help identify and tag material, significantly speeding up the time it takes to process and analyze each case.
- Information from other systems is easily migrated over, as well as exported for easy sharing .
- User access control and extensive audit logs create a secure environment for collaboration.

Focus on what's most important

A streamlined interface assists in the visualization and review of digital media, while advanced algorithms take care of tasks that you previously used to deal with manually.

- Pre-categorize and prioritize information
- Stack duplicates and filter out non-relevant material
- Detect and highlight critical clues
- Identify relationships

GET STARTED WITH EASE

Intuitive and easy-to-use from the start, the user interface enables you and your team to quickly and easily categorize, prioritize and review digital media.

INCLUDED

Griffeye Brain (AI)

Automatically detect and classify various objects in large image sets as well as identify and flag images and videos depicting CSA content to tell whether a file is pertinent to the investigation or not.

Analyze Forensic Market

An extensive digital marketplace gives you access to valuable apps developed by Griffeye and by third-party developers – allowing you to add new functionality as your needs change.

Griffeye Intelligence Database

Working in CS Operations, you have access to the Griffeye Intelligence Database (GID) to seamlessly share intelligence with other investigators — both within and across units.

Griffeye User Portal

MyGriffeye is the gateway to a large community of users, developers and other stakeholders. Exchange advice with fellow users, provide feedback on the platform, and take advantage of the Griffeye Analyze Online Education.
